Governing law and jurisdiction	The Bonds, and legal matters related hereto, are governed by Danish law. The judicial district, in which KommuneKredit has its headquarters at any given time, will have jurisdiction.

Other terms and conditions

Conditional extension of the term to maturity	When the Bonds are used to finance KommuneKredit's rate-adjustable loans and the term to maturity of an rate-adjustable loan is longer than the term to maturity of the Bonds, it shall apply to the Bonds, which on maturity are to be replaced by new bonds refinancing the rate-adjustable loan, that, if there are not enough buyers for all the required new bonds, then the term to maturity of the Bonds in question is extended by 12
---	---

BOND TERMS

months at a time, until refinancing can be completed with enough buyers for all the required new bonds. Thus, all or part of this series may be subject to extension.

Interest on the Bonds, which are subject to an extension on the term to maturity, is fixed at the Yield-to-maturity of a bond with an 11-14 months remaining term to maturity, fixed 11-14 months prior, plus 5 percentage points. Interest is fixed the first time the term to maturity of the Bonds is extended. Further extension of the term to maturity will not cause a change in interest.

Other Definitions

Day Count Fraction Act/Act (ICMA)

Means that:

- for a period corresponding to a whole Interest Rate Period the coupon payment per Denomination is calculated as: $\text{Denomination} * \text{Nominal Interest Rate} / \text{Number of annual Interest Rate Periods}$,
- for a period, which is shorter than the whole Interest Rate Period, the coupon payment per Denomination shall be calculated as: $\text{Denomination} * (\text{Nominal Interest Rate} / \text{Number of annual Interest Rate Periods}) * (\text{Actual number of days in the period} / \text{Number of days in the Interest Rate Period})$,
- for a period, which is longer than the whole Interest Rate Period, the coupon payment per Denomination shall be calculated as the sum of:
 - $\text{Denomination} * (\text{Nominal Interest Rate} / \text{Number of annual Interest Rate Periods}) * (\text{Actual number of days to fall within the Interest Rate Period in which the period starts} / \text{Number of days in the Interest Rate Period in which the period starts})$, and
 - $\text{Denomination} * (\text{Nominal Interest Rate} / \text{Number of annual Interest Rate Periods}) * (\text{Actual number of days falling within the Interest Rate Period in which the period ends} / \text{Number of days in$

BOND TERMS

the Interest Rate Period in which
the period ends).
